Our purpose in this systematic review is, therefore, to evaluate the currently available evidence about the physical, psychosocial, and cognitive effects of different hormonal therapies in transgender youth. By doing so, we can directly inform clinical practice involving this population and highlight existing knowledge gaps.

Recent research by health librarians suggests that hand-searching is still a requirement for the systematic review. Although keyword searching and reference harvesting reduce the need of doing hand-searches , it is thought that hand-searching (due to non-existent, incomplete and / or inaccurate indexing) supplements the structured, documented ...
