A DB-37M connector on the rear of the KI-525 connects to the GPS receiver outputs, the GPS/Nav annunciators/selector switch, and the autopilot inputs. The IRU-525 is powered by the existing Nav Flag power signal that already goes to the HSI. There is an ILS override input to force Nav receiver selection when an ILS

The KI-525 contained a Power flag instead of the standard Heading (HDG) flag as with the KI-525A. Therefore, pin P must be added to the existing KI-525 harness for the HDG flag in the KI-525A. If the HSI is being upgraded to the -07 version of the KI-525A, then there is another pin that must be jumpered.

The KI-256 is a gyro based attitude indicator that is an integral part of the KFC-200 flight control system. The KFC-200 autopilot is installed per STC. Therefore, it cannot be easily removed and replaced with another instrument. Recently, Garmin has developed the G600 flight deck retrofit that integrates with existing KFC-200 systems.

The Bendix-King KI-525A HSI and associated KCS-55A compass system was a popular avionics upgrade for light aircraft until the advent of the Sandell electronic HSI and, more recently, glass-cockpit systems from Garmin, Aspen and others. Although it is a mechanical device driven by some electronics, these units can give years of trouble-free service.
